I am satisfied with my notetaking method in this course.

I miss a lot because the lecturer goes too fast.

It is hard for me to pay attention in this class.

I miss a lot because I don’t know what is important for me to take down.

I have trouble reading and understanding my notes afterwards.

I edit my notes for this class as soon after taking them as possible.

I know how important the notes are in relation to the exams in the course.
